

Project Management for NASA Engineers

project management

presented by

Kim Terrell

Friday, September 18, 2009

8:30 a.m.–12:30 p.m.

Building 1, Room E100D

**Registration Required Please RSVP by Sept. 14, 2009 to Patricia Coffen*

Course Description: During this 4-hour NASA-centric Project Management workshop participants will:

- Gain an understanding of project management principles to apply in their current work
- Map project management methodologies to the requirements of the NASA Program/Project Management procedures
- Acquire knowledge of personal and interpersonal skills needed in the discipline
- Learn about industry and Agency project management practices

Who should attend?

Journey level engineers, project coordinators and supervisors (GS 12/13), either working in an introductory project management capacity or who have an interest in the discipline.

Why attend?

Learn how project management methodologies can be applied in varying technical roles and in different Goddard organizations. Apply knowledge learned on team exercises to analyze NASA mission case studies.

The Course Developer/Trainer: Ms. Terrell is the founder and principal consultant of Katz International Management Solutions, or KIMS, a technical project management company focused on supporting NASA and its contractors. KIMS' specialty involves applying systems engineering methodologies to deliver Policy and Procedures, IT Systems, Software, and Training. "Our focus is on Information Technology, Aerospace and Telecommunication Programs. At KIMS your project success is our mission!"

Prior to starting KIMS, at Goddard Space Flight Center Kim: facilitated an enterprise architecture working group (made up of each of the Center's directorates), managed the production of the monthly State of the Center report for the Office of Mission Success, and delivered millions of dollars of hardware, software and services in support the Earth and Space Science Data Centers.

Early in Kim's career she worked in the finance industry supporting the customer service organization of the Chicago Stock Exchange, and the financial news services team at Dow Jones Inc. She started at Goddard as an intern and scholarship awardee in the mid-1990s. Kim's experience includes working as a civil servant (Stay-in-School Program) and serving as a contractor (Futron and Sun Microsystems). Ms. Terrell earned a M.S. in Space Studies from International Space University, Strasbourg, France, and a B.S. in Computer Engineering (software specialization) from Illinois Institute of Technology.

**Sponsored by: National Society of Black Engineers
Greenbelt Space Chapter (NSBE)**
